Suitable Extinguishing Media:

Use fire extinguishing methods suitable to surrounding conditions.

Specific Hazards Arising from the Chemical:

Emits toxic fumes under fire conditions. Non-combustible liquid.

Special Protective Equipment and Precautions for Fire Fighters:

Wear approved self-contained breathing apparatus and full protective clothing.

6. ACCIDENTAL RELEASE MEASURES

Personal Precautions, Protective Equipment and Emergency Procedures:

Wear approved self-contained breathing apparatus and full protective clothing. Evacuate all non-essential personnel from affected area. Do not breathe vapors/mists. Ensure adequate ventilation.

Environmental Precautions:

In the event of a major spill, prevent spillage from entering drains or water courses.

Methods and Materials for Containment and Cleaning Up:

Stop leak if safe to do so and neutralize spill with soda ash or lime. Absorb spill with sand, earth, vermiculite or some other absorbent material. Collect the spilled material and place into a suitable container for disposal. Provide adequate ventilation. Neutralize spill with soda ash or lime.

7. HANDLING AND STORAGE

Precautions for Safe Handling:

Use of safe work practices are recommended to avoid eye or skin contact and inhalation of vapors/mists. Food, beverages and tobacco products should not be stored or consumed where this material is in use. Always wash hands before smoking, eating, drinking or using the toilet. Wash contaminated clothing and other protective equipment before storage or re-use. Provide eyewash fountains and safety showers in close proximity to points of potential exposure.

Conditions for Safe Storage:

Store in a cool, dry and well ventilated area. Keep container tightly closed when not in use. Keep away from strong bases, finely powdered metals. Check regularly. Protect from physical damage.

Exposure Standards:

7664-38-2 Phosphoric acid

NES | STEL: 3 mg/m³ TWA: 1 mg/m³

Engineering Controls:

Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapor below occupational exposure standards.

Personal Protective Equipment (PPE):

Respiratory Protection:

Respiratory protection required if airborne concentration exceeds TLV. At concentrations up to 12 ppm, a high efficient particulate filter is recommended. Above this level, a self-contained breathing apparatus is advised.

Skin Protection:

Polyvinyl alcohol gloves. Occupational protective clothing (depending on conditions in which it has to be used, in particular as regards the period for which it is worn, which shall be determined on the basis of the seriousness of the risk, the frequency of exposure to the risk, the characteristics of the workstation of each worker and the performance of the protective clothing).

Eye and Face Protection:

Eye and face protectors for protection against splashing materials or liquids.
